The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). The arguments presented by the applicant have been fully considered but fail to place the application in condition for allowance

Regarding independent claims 1, 13, and 21, the applicant argues that Codilian fails to teach the claimed invention because he discloses approximating error by the standard deviation of averages, not individuals. The applicant goes on to state that Codilian is silent regarding basing an RRO estimate on data from one revolution. The examiner disagrees. In Figure 6A, Codilian specifically shows RRO measurement based on one disk revolution. The fact that the standard deviation of an RRO measurement based on one revolution is relatively larger than the standard deviation of an averaged RRO measurement based on multiple revolutions is irrelevent. Codilian uses the variable "N" to define the first number of disk revolutions and no where in the specification is "N" limited to greater than 1.
